Brand New Book ***** Print on Demand *****.Excerpt from The Twentieth Century Atlas of Popular Astronomy: Comprising in Sisten Plates a Series of Illustrations of the Heavenly Bodies The progress Astronomy during the nineteenth century has exhibited itself in two distinct forms, the march of scientific discovery and the increasing interest shown in the science by the general public. The discovery of the spectroscope and the application of photography to astronomical research have opened up new and intensely interesting branches of the science, while the older and more strictly mathematical department has been no less vigorously pushed forward. The second form of progress alluded to, for progress it must assuredly be admitted to be, would seem to depend for its existence on the first. The daily increasing interest in the study of Astronomy is doubtless due in a large measure to the rapid advances made in the science, and to the enlarged means of publishing, and above all to the improved methods of illustrating the accomplished facts as soon as they have reached the point at which they can be made interesting and intelligible...
