

A Manual of Laboratory Exercises in Physics (Paperback)

Filesize: 1.19 MB

Reviews

It is one of the best books. Indeed, it really is play, nevertheless an amazing and interesting literature. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Sofia Yundt)

A MANUAL OF LABORATORY EXERCISES IN PHYSICS (PAPERBACK)

To save **A Manual of Laboratory Exercises in Physics (Paperback)** eBook, make sure you click the link listed below and download the file or have access to additional information that are highly relevant to A MANUAL OF LABORATORY EXERCISES IN PHYSICS (PAPERBACK) ebook.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1912 Excerpt: .temperature First reading of pointer Second reading of pointer Rise of pointer on scale I First trial Second trial Length of pointer Diameter of roller Length of rod between supports Elongation of rod Coefficient of expansion of Accepted coefficient Per cent of difference B. Second Method Materials.--An expansion apparatus similar to that shown in Fig. 27. A meter stick. Micrometer screw gauge. Copper boiler. Thermometer. Funnel. Ring stand. EXERCISE 1. The operations described in 2 and 3 under the First Method are to be followed in this exercise. The pointer in Fig. 27.--Apparatus for the Accurate Measurement of Expansion. this case refers to the index E, Fig. 27, which moves in front of the circular scale D. 2. Measure the length of the rod AB between the support F and the roller C. Measure the diameter of the roller G with the screw gauge in at least four different places. 3. Make a second trial by beginning with cold water as before and repeating the operations described. 4. Since in order to produce one complete revolution of the roller, the rod would have to expand an amount equal to the circumference of the roller, the expansion actually made by the rod is given by the following equation: . degrees moved over . f. Expansion =--2 X circumference of roller. Prom the measurements taken in each trial, compute the expansion of the rod for the entire change in temperature and the coefficient of expansion of the metal...
