The Variation and Correlations of Certain Taxonomic Characters of Gryllus (Classic Reprint) (Paperback)

By Frank E Lutz

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from The Variation and Correlations of Certain Taxonomic Characters of Gryllus I wish also to thank, at this time, those who have helped me to secure data. That part of these data which is used in the present discussion, together with the constants calculated from them, are given in the Appendix. Unless otherwise stated all the measurements are from mature females. I. The Taxonomy of Gryllus Native to Eastern States. De Vries (1904) considers that specific characters are usually sharply defined against one another. They are, according to him, separate qualities more often than different degrees of the same quality. This is not true of the crickets, as they are now named. One species does not possess units which the others of the same genus lack, but one species differs from the others merely in the degree of common characters. Presence or absence of characters (e. g., mobility of tibia! spines, teeth between these spines, etc.) are considered of generic or higher value. Davenport Blankinship (1898) have expressed the expectation that biometry would furnish us with...
