aPress, United States, 2014. Paperback. Book Condition: New. 2014 ed.. 234 x 188 mm. Language: English . Brand New Book. Web development is still one of today s most popular, active, and important programming and development activities. From a single web page to an e-commerce-enabled web site to a fully-fledged web application, the Java programming language and its frameworks allow you great flexibility and productivity for your web application development. Learn Java for Web Development teaches web developers who are new to Java key skills, Java-based languages, and frameworks to build simple or complex web sites and applications. As soon as you pick up this book, Vishal Layka s experience guides you on a very practical learning and building journey. You will learn the Java nuts and bolts necessary to build a simple HelloWorld Java (native) application, as well as a HelloWorld Java-based web application example that utilizes servlets and Java Server Pages (JSPs). Over the course of the book, you ll learn more about servlets and JSPs and delve into Java Server Faces (JSFs) and the expression language found in each of these by applying them in a real-world case study--a book store e-commerce application. Then you ll build your web application using Apache Struts2 and the Spring MVC framework. The book concludes by exploring the web application that you ve built and examining industry best practices and how these might fit with your application, as well as covering alternative Java Web frameworks like Groovy/Grails and Scala/Play 2. You also can explore the basics of Java, Groovy, and Scala in the book s appendices. While reading this book, you ll see all this in action and you can use it as a starting point for further Java web development. Study and experiment with the many source code examples, and...
